

Moving from SimView™ to SimCapture

Achieve your Learning Objectives, From Anywhere

SimCapture allows you to effectively manage, record, and assess simulation training, both on-site and remotely. Users have the ability to capture audio, video, annotations, patient monitors, and simulator data in a single web-based interface.

Remote Learner Access

Learners can access their sessions for debriefing, complete evaluations on themselves or peers, and view their scores and reports from anywhere.

On-site or In-situ Recording

Use the SimCapture system or the iOS app to record your faculty or small learner groups in your simulation center demonstrating skills, assessments, etc. and allow your students to remotely view and complete evaluations based on them.

Virtual Debriefing

Record students in small groups in your simulation lab, then use SimCapture to allow other students to view the recording and debrief from home.

Make the Switch

Transitioning to SimCapture will allow your organization to take advantage of many benefits including:

Engage learners, on-site or remotely

- View recorded sessions from anywhere
- Share sessions to be debriefed/evaluated both internally and externally
- Learners can complete self-reflections to support guided debriefing and independent review

Expanded capture options

- Besides capturing a Laerdal patient monitor and data log, record just about any real medical device with a VGA, DVI or HDMI output to enhance the simulation and debriefing experience
- Extend the reach of your SimCapture platform by turning any iOS mobile phone or tablet into a capture and annotation device

A platform that grows with you

- As your needs grow, you can increase your functionality with a simple software upgrade. Or, if your program adds additional rooms or a new campus, you can easily add additional hardware without interrupting center usage or activities.

Powerful integration

- SimCapture is fully integrated with SimPad PLUS and LLEAP, making operation and debriefing seamless. SimCapture can also be used with non-Laerdal simulators.

Turn data into insights

- Generate customizable reports and analytics- Utilization, monitor center activity, user contact hours, and much more

Reliable & secure

- Take advantage of our 100% web-based and mobile friendly platform
- Cutting edge security practices and highly reliable infrastructure provides 99.99% uptime at a minimum

Seamless Transition

Our friendly and knowledgeable team is focused on making the transition from installation to operation a smooth and stress-free experience.

- A **Project Manager** will hold your hand through the process of getting SimCapture installed in your center
- From **turnkey AV installation** to SimCapture integration, you can expect the work to be completed by one of our AV specialists
 - You may be able to reuse some, if not all, of your AV equipment
*depending on the age of your equipment
 - If needed, we can move your data files from SimView to SimCapture
- Our Education team provides a **full range of training services** designed to help you succeed from day one
- Take advantage of our **limited time discount** available exclusively for SimView customers

Visit Laerdal.com/SimCapture to learn more or contact your local representative for a demonstration.
